

Labelling system

Labelling systems- easier to manage raw materials and the products throughout the production value chain

Labelling system can be delivered with two different setup:

- The equipment (printers) is operated from the shop floor, but all texts, layouts and other variables is programmed on a PC, and afterwards dumped to the label printers
- All the settings, texts, layout and variables operated at the label printer

INNOVA Labelling system from Marel:

INNOVA Labelling makes it much easier to manage raw materials and the products throughout the production value chain.

- Simplify your labelling process
- Improve and speed up label design with a user-friendly label designer
- Meet varying design, language, and customer need with ease
- Gain better monitoring and controls with centralized printer management
