

Bag in box and bag sealing

Easy Plast and Easy Seal from Niverplast: flexible machines to be integrated in a variety of solutions

Easy Plast:

Works fully automatically to insert easy open bags in boxes, crates, buckets etc.

Easy Seal:

Fully automatically closes bags in crates, boxes, buckets etc. by folding or sealing. The Easy Seal can handle almost any film material

Tray Plast 480 T:

Machine specially designed to erect CoolSeal trays and insert Easy Open bags in the erected tray. Because of the integration of both concepts, the machine is very compact

Coolseal box erector/gluer:

The machine magazine is loaded with flat blanks. The machine selects a flat blank either automatically or on demand and applies the four corners with hot melt glue. The flat glued blank is then formed through a mould and deposited out of the bottom on to a conveyor or chute
