

Strapping systems

Strapping systems with high capacity for EPS-boxes

First Process has great experience with most of the reliable strapping machines in the market and can adapt and deliver according to customer request. Whether it is German, Switzerland or Japan made machinery, FP has the knowledge and will make the machines play according to the other machinery online.

The most important for our customers is that they have:

- A reliable strapping system to ensure maximum throughput
- Easy maintenance.
- Technical personnel that knows the equipment.
- Security, to avoid unwanted stop of production, it is recommended to use 2 machines in line.

Then you can change between using both strappers, only strapper 1 or strapper 2.

(Especially when changing strapping material).
