

# Plate freezing systems

**Vertical- and horizontal freezing systems have a really low freezing time compared with other freezing solutions**

- **Horizontal plate freezing system:**
- The fully automatic horizontal plate freezer is ideal when continuous freezing is required
- Designed for easy cleaning and maintain
- High flexibility, with one automatic loading station and one automatic unloading station
- Smooth freezing surface preventing marks in the packaging

## **Vertical plate freezing system:**

- Vertical plate freezing system are well-known for high capacity and high quality.
- Manually or Automated operated systems
- Vertical freezing system are highly appropriate to freeze different kinds of fish
- Also possible with automatic unloading system
