

FP Bottom conveyor

Designed to transport empty cartons to the filling position

FP Bottom conveyor

The Bottom conveyor are designed to transport empty cartons to filling position under scale- and filled cartons to roller conveyor. The conveyors are equipped with side guides and pneumatic operated stopper to prevent fish from falling out of the cartons during filling.

Machine specifications:

- Length: 2800mm
- With: 450mm (adjustable ± 50 mm)
- Belt: Plastic modular with rubber module
- The Conveyor is frequency controlled from the scale.
