

FP Bag in box and lid applicator

The FP Packing machines is an Innovative packing machine for vacuum bags. Automatic bag in box and lid application integrated.

FP Bag in box and lid applicator

With this new innovative all-in-one machine, your thermoform packing line gets a new dimension. With very modest dimensions, high capacity (9-10 cycles/min) and all operations integrated in this machine, you can fit your thermoform line in most locations. The machine is based on the well known 3-conveyor design to ensure high capacity and has a very open design to make maintenance and regular operation easy. The machine has been used in the Norwegian fillet production for almost 10 years and the feedback is very good. The modest dimensions combined with high capacity gives a new competitive edge to your facility.

Machine specification:

- Overall Length: 2300 mm
- Overall Width: 750 mm
- Overall Height:
 - Frame: 1400 mm \pm 50mm.
 - Top of electrical cabinet: 2250 mm \pm 50mm.
 - Top of conveyor belt feeding bags: 1050mm \pm 50mm
 - Top of outlet conveyor: 900mm \pm 50mm
